

32-38 Leman Street, London, E1 8EW

Dear Florence Care Professional,

From July 2014, it became law that all nurses and midwives must hold professional indemnity cover as a requirement of their continuation of practice.

Each nurse, midwife and nursing associate is now responsible for making sure they have the appropriate professional indemnity cover for their role and scope of practice.

The cover they have in place should be relevant to the risks involved in their practice, so that it is sufficient if a claim is successfully made against them.

As a PAYE worker through Florence, we provide you with Professional Indemnity cover up to £10 million, whilst you are working through Florence. This cover is exclusively for Florence shifts. It will not cover you if you are working through any other agency or employer.

Hiscox	
Policy Number :	PL-PSC10003137025/04
Expiry Date :	26 October 2024

If you are working through Florence with a domiciliary care provider, it is likely that they will also have Professional Indemnity Insurance in place. You may wish to contact the domiciliary care company if you have any concerns or questions regarding their level of cover in relation to your practice.

Charles Armitage
Chief Executive
